

Microsoft Authenticator Setup Guide

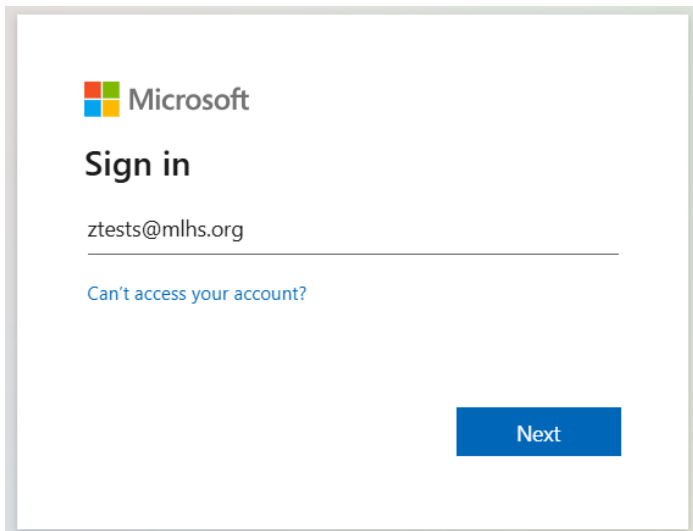

Step 1: Install the Microsoft Authenticator App

- On iPhone: Open the App Store
- On Android: Open Google Play
- Search for Microsoft Authenticator (by Microsoft Corporation)
- Tap Install, then open the app.

Step 2: Visit the Microsoft Security Setup Page

- Open a web browser and go to: <https://aka.ms/mfasetup> on your computer web browser (i.e. Chrome, Edge, or Firefox)

- The app will register your account and show a 6-digit code

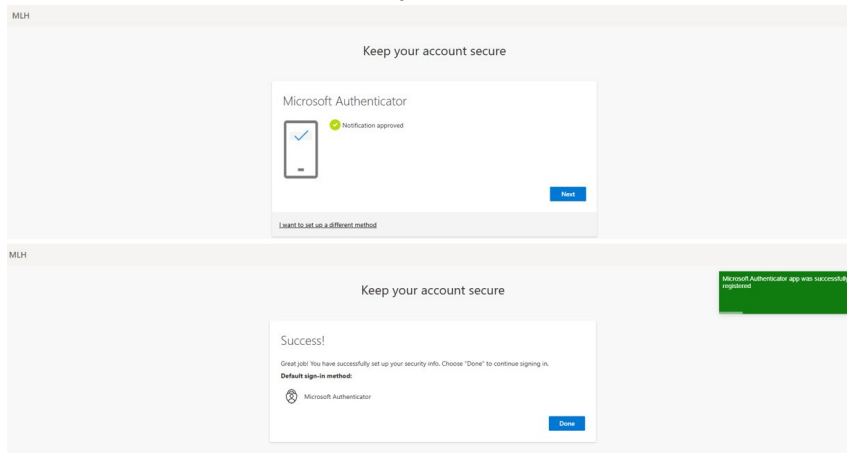

- On your computer screen enter your code:

- Then click next.

Step 4: Confirm Setup on Your Computer

- Back on your computer, click Next once the app displays your account. Once approved, click Done in your browser to finish setup.

Using Microsoft Authenticator to Sign In

- Go to the website or app you want to access
- Enter your **username** and click **Next**
- Select **Send notification**
 - (If not visible, click **Other ways to sign in > Approve a request on my Microsoft Authenticator app**)
- You may be shown a number to enter
- On your phone, open the **Authenticator app** or tap the **notification**
 - (You may need to **unlock the app** first for work/school accounts)
- Tap or enter the **number shown**, then tap **Approve**
